CAREER OBJECTIVE

Aspiring AI and Data Analytics engineer seeking an opportunity to apply my programming, problem-solving, and analytical skills to build innovative solutions. Eager to learn, contribute to impactful projects, and grow while delivering value to the organization.

EDUCATION

B.Tech, Computer Science & Engineering GLA University, Mathura	2025 - 2029
Senior Secondary (XII), RBSE Prince Academy Of Higher Education, Sikar Percentage: 79.00%	2024
Secondary (X), CBSE Prince Academy Of Higher Education, Sikar Percentage: 89.90%	2022

TRAININGS / CERTIFICATIONS

TCS ION – AI For All Initiative

Jul 2026

TCS, Virtual

Completed the AI and Cybersecurity Awareness course under the AI for All initiative, developing a foundational understanding of artificial intelligence, cybersecurity principles, responsible AI practices, and digital security awareness.

NEC Corporation India

Oct 2025

Eduateral Foundation, Mathura

GLA University
Successfully completed the AI Mastery: Unlocking the Power of Artificial Intelligence program, gaining both theoretical knowledge and practical exposure to core AI concepts, intelligent systems, and real-world applications of artificial intelligence.

Intel® Unnati Lab

Oct 2025

Eduateral Foundation, Mathura

Successfully completed a hands-on workshop focused on AI algorithm development using Python. Gained practical exposure to implementing fundamental AI concepts, problem-solving techniques, and Python-based algorithm development for real-world applications.

PROJECTS

[IntervIQ ↗](#)

Mar 2026 - May 2026

IntervIQ is an AI-powered mock interview platform designed to help students and job seekers improve their interview skills through realistic, personalized interview sessions. Unlike traditional question banks, IntervIQ dynamically adapts the interview based on the candidate's performance, making each session feel like a real technical or HR interview.

The platform allows users to choose interview parameters such as job role, experience level, interview type (Technical, HR, Mixed, DSA, or System Design), and the number of questions. During the interview, the AI asks relevant questions, listens to the candidate's spoken responses, converts speech into text, evaluates the answers using a Large Language Model (LLM), and generates the next question according to the candidate's performance.

SKILLS

- Web development
- Python
- JavaScript
- SQL
- Operating Systems
- Java

ADDITIONAL DETAILS

- Completed certifications and workshops in Artificial Intelligence , Python, SQL, Microsoft Azure Fundamentals, Cybersecurity, and Data Science through Microsoft, IIT Roorkee , IIT (BHU) Varanasi and HackerRank .
